

Ungenerate dioxin even when incinerated Polyethylene sheet with antibacterial agent

Bacteria and molds not only generate foul odors, but may also affect the human body through contact and inhalation of bacteria.

An antibacterial film that uses a highly safe inorganic antibacterial agent to prevent the growth of bacteria.

- For partitioning at cash registers and counters (Scattering prevention measures)
- Prevention of infection measures such as simple gowns, aprons, and dustproof clothing
- Mask case (for disposable use)

Comparison between PVC (vinyl sheet) and polyethylene

	Price	Weight	Workability	Disposal (Generation of dioxins)
Polyethylene	Cheap	Light	Easy	No
PVC	Expensive	Heavy	Difficult	Yes

Standard sheet

Thickness (mm)	Width (mm)	Length (m)	Paper tube size	Quantity
0.05	1000	30	2inch	One

- Custom sizes are also available
